Profile

Software engineering student with a strong interest in full-stack development and artificial intelligence. Experienced in building scalable web apps and data-driven systems using modern technologies. Looking for a 9-week internship (July–August 2026) to apply and expand my technical skills in a collaborative environment.

Technical Skills

Languages	JavaScript / TypeScript, Python, Java, C
Frameworks	Angular, React, Vue.js, Spring Boot, FastAPI
Databases	PostgreSQL, MongoDB, MySQL
DevOps & Tools	Docker, Git, Ansible, CI/CD, E2E Testing

Work Experience

Software Engineer Intern

Sep 2025 – Present

ChemAI, Lyon, France

- Designed and implemented machine learning pipelines for molecular property prediction and chemical data analysis.
- Developed scalable APIs and backend services (FastAPI) to deploy AI models for research partners.
- Processed, structured, and cleaned large-scale scientific datasets for model training and evaluation.
- Improved ChemAI's AI platform usability and integration for chemistry researchers.

Full-Stack Developer Intern

Sep 2024 – Aug 2025

Bayard, Meyzieu, France

- Developed and deployed a web application (Angular + Django) for hydraulic valve sizing.
- Integrated automated testing and CI/CD pipelines to improve reliability.
- Maintained and enhanced the company's connected products management platform.

Software Developer Intern

Apr 2023 – Jun 2023

CNRS Computer Science Lab, Lyon, France

- Developed AI models for clustering and data analysis tasks.
- Contributed to QUALITOP, a patient monitoring platform for cancer treatment.
- Processed and visualized large medical datasets for research purposes.

Selected Projects

TakeNote — Web application for note-taking and storage built with TypeScript, showcasing frontend development and local data management. **Sportify** — Sports prediction web app with blog, shop, and mini-game features; built with JavaScript, PHP, and CSS, focusing on responsive design and gamified user experience.

Education

Engineering Degree in Computer Science

2025 – 2028 (Expected)

IMT Mines Alès, France – Graduate Engineering School
